DETAILED ACTION

Claims 1-42 are being examined.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Group 1: Claims 1-13 and 29-42 are drawn to a server storing data in response to a request from a client in 709, subclass 203.
- II. Group 2: Claims 14-28 are drawn to a client accessing a remote server in class 709, subclass 219.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Invention I has a separate utility such as in a system for storing data and processes requests from client devices. Invention II has a separate utility such as a client accessing a remote server for data manipulations. See MPEP § 806.05(d).

These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

(a) Group I search (claims 1-13 and 29-42) would require use of search **Class 709, subclass 203**.

(b) Group II search (claims 14-28) would require use of search **Class 709**,

subclass 219.

A telephone call was conducted with Mr. Mark Pratt, the applicant's representative, on February 25, 2005 to address the possibility of a restriction election. The applicant requested that a restriction notice be sent out so they can make the appropriate decision. The applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined. The applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to make an election.
